## **NEWS RELEASE**

### **L-3 Klein Introduces Newly Developed Model 4000 Multi-Beam Side Scan Sonar for Port & Harbor Security**

SALEM, NEW HAMPSHIRE, October 3, 2007— L-3 Communications Klein Associates, Inc. is pleased to announce the release of the Model 4000 Multi-Beam Side Scan Sonar system. The system is a high performance, 5 beam dynamically focused, economical system designed specifically to address the requirements of Port & Harbor Security applications. This system is also ideally suited for small object detection in open boat operations.

Performance of the Klein Model 4000 is close to the specifications and performance of the Klein System 5000 technology but at a much lower cost. The system is designed with a single hull configuration which reduces the length and weight of the towfish enabling use on smaller boats with various configurations.

The Model 4000 is focused on Port and Harbor Security. As you are all aware, Cities, States and Governments are concerned about the security of their ports and harbors. Movement of goods by sea is key and critical to every country's economy. All governments have realized that their ports and harbors must always remain open to receiving and shipping goods around the world if they want to maintain a viable economy. Any underwater danger whether real or perceived can close a harbor. The new Klein System 4000 will assure port and harbor integrity when utilized.

Contact us today to find out more about the Model 4000.

####

Headquartered in Salem, New Hampshire, L-3 Communications Klein Associates, Inc. is a leading sensor technology company which manufactures and designs high-resolution sonar systems, marine navigation systems, and radar based security and surveillance systems. Klein's customers include commercial, government and military organizations, shipping and offshore oil companies and related support contractors, maritime facilities, academic institutions and underwater vehicle manufacturers.
