NEWS RELEASE

L-3 Communications Klein Associates, Inc. receives 4th order for Early Warning Detection System for critical offshore asset protection

The system provides surveillance and security for the offshore industry operating in volatile regions.

SALEM, NEW HAMPSHIRE, January 29, 2008 - L-3 Communications Klein Associates, Inc. is pleased to announce that it has received its fourth consecutive order for a HarborGuard® Early Warning Detection System to be installed on an offshore construction vessel operating in coastal waters. This award validates L-3 Klein's concept and vision that moving vessels, as well as fixed platforms, require advanced warning capability of approaching unauthorized or threatening craft. New enhancements to the HarborGuard® software takes into account the vessel's motion providing a moving security zone and allowing accurate positioning of sensors regardless of vessel's attitude.

This system, based on a layered approach, provides the ability to detect, assess and deter threats. First, multiple small target detection radars provide 360 degree coverage. In addition, long range infrared cameras allow identification and assessment of potential threats. Finally, Long Range Acoustic Device (LRAD) units are used to engage the threat with clear, audible warning messages.

All sensor information is combined on an integrated operator console providing the necessary display, monitoring and automatic alarm functions of the system. A remote access capability allows the home office to view critical system operations during elevated threat conditions or for remote training and support activities.

L-3 Klein's HarborGuard® product line is in use worldwide for offshore, harbor and naval waterside security and surveillance system applications.

####

Headquartered in Salem, New Hampshire, L-3 Communications Klein Associates, Inc. is a leading sensor technology company which manufactures and designs high-resolution sonar systems, marine navigation systems, and radar based security and surveillance systems. Klein's customers include commercial, government and military organizations, shipping and offshore oil companies and related support contractors, maritime facilities, academic institutions and underwater vehicle manufacturers.
